## - Business process: ①Raw seaweed purchasing ②Dried seaweed figuration dry ③Refrigeration warehouse stock, fire dry ④Export and domestic sale

## - Product Introduction

Factory No.2-1 and No.2-2 are factories specializing in dried seaweed(sushi seaweed) manufacture, and produce many forms of dried seaweed including  $250 \pm 2.5\%$ ,  $260 \pm 2.5\%$ ,  $270 \pm 2.5\%$ ,  $280 \pm 2.5\%$ ,  $300 \pm 2.5\%$ ,  $320 \pm 2.5\%$  etc.

## - Product Features: We manufacture dense seaweeds with fixed sizes by cutting raw seaweed produced by natural spores from early January to early April into pieces shorter than 3.0mm. (Factories are located in Soahndo Island where the initial materials of dried seaweed (sushi seaweed) are of high quality, and the island's raw seaweed makes our products free of foreign substances, shiny, tasteful, and clean.)

## Product Competitiveness

The distribution system of Korean seaweed is ①Farming in the sea → ②Dried seaweed production → ③Stock (keep frozen) → ④Export. The whole process which is divided due to domestic sales procedures is operated entirely by our own company, giving us an edge in quality and price reduced from retail margins.
